

1. Name of the Project: CAB BOOKING

Description:

A Flutter starter taxi app built with BLOC pattern. It has following features

- Taxi markers showing on different position on map (Based on static position)
- Different animations across different part of screen
- Polyline showing on map (Hardcoded data from Google Maps API)
- Runs on both Android & IOS.
- It helps in managing state and make access to data from a central place in your project.
- Its a state management system for Flutter recommended by Google developers.

2. Technologies
